

Market-Leading Web Conferencing Services

Better Business with Web Conferencing

-  **Travel Less**
Hold meetings with remote participants without the expense and hassle of travel.
-  **Control Expenses**
Meet your budget by reducing the cost of meetings, travel and sales calls.
-  **Improve Productivity**
Collaborate with your team to get everyone on the same page. Make faster, more efficient decisions.
-  **Increase Sales**
Conduct remote sales calls without travel. Increase the amount of people you can connect with.
-  **Conduct Trainings**
Train customers or employees on the latest products and services.

Copper Conferencing has a full suite of market-leading web conferencing services to meet every business need and budget requirement.

Adobe® Acrobat® Connect Pro is designed to make remote meetings easy for both the moderator and participants. Enter a web conference meeting without a download or a plug in installation and use the service on either a Mac or PC. Invite participants using Microsoft® Outlook® and control Copper Conferencing's On Demand audio service from an easy-to-use web interface. Pricing plans are available by the minute or as a subscription.

Microsoft Office Live Meeting is one of the world's most popular and reliable web services offering capabilities for smaller meetings as well as events. Designed for PCs, Live Meeting fully integrates with all Microsoft Office applications and offers full event services. Live Meeting is available for a fixed monthly price or as a usage-based service.

WebPresentNow  WebPresentNow™ is Copper's low cost web conferencing service designed for everyday meetings or remote sales calls. There is no download needed and can be used on a Mac or PC. WebPresentNow is available for a low fixed price per month. The service has full call features including recording, screen sharing, audio integration and video through web cams.

The market leader and pioneer in web conferencing, Cisco WebEx® is most appropriate for companies who need customization for users who manage larger scale events, conduct training, need access to desktops for customer service or hold company meetings. Use WebEx on both a PC and Mac with different software versions designed for e-learning, events, meetings, customer support and marketing functions.
